News Release: 15-16

Adamera Minerals Update

Vancouver, BC, October 7, 2015 - Adamera Minerals Corp (ADZ-TSX: V) Adamera Minerals reports that the US Forest Service roads in Washington State have been reopened and industrial activity restrictions have been reduced. Surface work on Adamera's mineral properties has resumed.

Road closures and industrial activity restrictions due to fire threat have curtailed work by Adamera since August. Previous summer exploration work consisted of mapping on the Oversight, Flag Hill and Lambert Creek properties to continue developing drill targets.

"The wild fires in northeast Washington State this summer were extremely serious, and greatly affected the region. Adamera is grateful to the fire fighting crews and the communities for their tireless efforts in getting these devastating fires under control. We have resumed activities on our projects," says Mark Kolebaba, President and CEO of Adamera Minerals Corp.

Over the coming weeks, the Company expects to release information pertaining to recent work completed.

About Adamera

Adamera Minerals Corp. is exploring for high-grade gold deposits within hauling distance of the operating Kettle River Mill in northeastern Washington State. The Company's strategy is to fast-track the discovery to production process by exploring close to a mill in need of ore. Adamera is exploring several projects with a goal to become the dominant exploration company in the area and to be positioned for M&A activity.

On behalf of the Board of Directors,

Mark Kolebaba
President & CEO
