ADAMERA MINERALS CORP.

Notes to the Condensed Consolidated Interim Financial Statements

For the Nine Months Ended September 30, 2017

(Unaudited; Expressed in Canadian Dollars)

1. Nature and Continuance of Operations

Adamera Minerals Corp. ("the Company") was created in February 2013 pursuant to an amalgamation under the Business Corporation Act (British Columbia). The Company's common shares are listed for trading on the TSX Venture Exchange ("Exchange"). The Company is in the process of actively exploring its mineral properties and has not yet determined whether these properties contain ore reserves that are economically recoverable. The Company is considered to be in the exploration stage and does not have operating cash flow.

The Company's head office, principal address and registered and records office is 1100, 1111 Melville Street, Vancouver, British Columbia, Canada, V6E 3V6.

These financial statements of the Company have been prepared in accordance with International Financial Reporting Standards ("IFRS") on a going concern basis, which contemplates that the Company will be able to realize its assets and discharge its liabilities in the normal course of business. Accordingly, these financial statements do not include any adjustments to the amounts and classification of assets and liabilities that might be necessary should the Company be unable to continue as a going concern.

The Company's continuing operations as intended are dependent upon its ability to identify, evaluate and negotiate the acquisition of, participation in or interest in new properties, assets or business opportunities, and raise additional funds by way of equity financings. Any acquisition may be subject to shareholder and regulatory approval and obtaining the necessary financing. Should the Company be unable to complete such a transaction, its ability to raise sufficient financing to maintain operations may be impaired. The available funds are insufficient to continue operations for the ensuing year. Although the Company has been successful at raising funds in the past through the issuance of share capital, it is uncertain whether it will be able to continue this financing in the future. These material uncertainties may cast significant doubt on the Company's ability to continue as a going concern.

2. Statement of Compliance and Basis of Preparation

These condensed consolidated interim financial statements, including comparatives, have been prepared in accordance with International Accounting Standard 34 "Interim Financial Reporting" ("IAS 34") using accounting policies consistent with IFRS issued by the International Accounting Standards Board ("IASB") and interpretations of the International Financial Reporting Interpretations Committee ("IFRIC").

These condensed consolidated interim financial statements have been prepared on a historical cost basis except for marketable securities classified as available-for-sale, which are stated at fair value through other comprehensive income (loss). In addition, these condensed consolidated interim financial statements have been prepared using the accrual basis of accounting, except for cash flow information.

The preparation of these condensed consolidated interim financial statements in conformity with IAS 34 requires management to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, income and expenses. Actual results may differ from these estimates. These condensed consolidated interim financial statements do not include all of the information required for full annual financial statements.

These condensed consolidated interim financial statements, including comparatives, have been prepared on the basis of IFRS standards that are published at the time of preparation.

ADAMERA MINERALS CORP.

Notes to the Condensed Consolidated Interim Financial Statements

For the Nine Months Ended September 30, 2017

(Unaudited; Expressed in Canadian Dollars)

3. Significant Accounting Policies

These unaudited condensed consolidated interim financial statements have been prepared in accordance with IFRS as issued by the IASB on a basis consistent with those followed in the Company's most recent annual financial statements for the year ended December 31, 2016.

These unaudited condensed consolidated interim financial statements do not include all note disclosures required by IFRS for annual financial statements, and therefore should be read in conjunction with the annual financial statements for the year ended December 31, 2016. In the opinion of management, all adjustments considered necessary for fair presentation of the Company's financial position, results of operations and cash flows have been included. Operating results for the nine month period ended September 30, 2017 are not necessarily indicative of the results that may be expected for the current fiscal year ending December 31, 2017.

(a) New accounting standards and interpretations

Certain new accounting standards and interpretations have been published that are not mandatory for the September 30, 2017 reporting period. The Company has not early adopted the following new and revised standards, amendments and interpretations that have been issued but are not yet effective:

- IFRS 9 (Amended 2010) Financial Instruments (effective January 1, 2018)
- IFRS 15 Revenue from Contracts with Customers (effective January 1, 2018)
- IFRS 16 Leases (effective January 1, 2019)

The Company anticipates that the application of the above new and revised standards, amendments and interpretations will have no material impact on its results and financial position.

(b) Financial Instruments

The Company classifies its financial instruments measured at fair value at one of three levels according to the relative reliability of the inputs used to estimate the fair value:

- Level 1 – quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2 – inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices); and
- Level 3 – inputs for the asset or liability that are not based on observable market data (unobservable inputs).

(i) Financial assets

The Company classifies its financial assets into one of the following categories as follows:

Fair value through profit or loss - Financial assets are classified as fair value through profit and loss when the financial asset is held for trading or it is designated as such. A financial asset is classified if it has been acquired for the purpose of selling in the near future, it is part of an identified portfolio of financial instruments that the Company manages and has an actual pattern of short-term profit-taking; or it is a derivative that is not designated and effective as a hedging instrument. Financial assets are stated at fair value with any resultant gain or loss recognized in profit or loss. The net gain or loss recognized incorporates any dividend or interest earned on the financial asset. The Company has classified cash as fair value through profit or loss.

ADAMERA MINERALS CORP.

Notes to the Condensed Consolidated Interim Financial Statements

For the Nine Months Ended September 30, 2017

(Unaudited; Expressed in Canadian Dollars)

3. Significant Accounting Policies (continued)

(b) Financial Instruments (continued)

(i) Financial assets (continued)

Loans and receivables - Trade receivables, loans, and other receivables that have fixed or determinable payments that are not quoted in an active market are classified as loans and receivables. Loans and receivables are initially recognized at the transaction value and subsequently carried at amortized cost less impairment losses. The impairment loss of receivables is based on a review of all outstanding amounts at period end. Bad debts are written off during the period in which they are identified. Interest income is recognized by applying the effective interest rate, except for short-term receivables when the recognition of interest would be immaterial. The Company classifies its receivables as loans and receivables.

Held-to-maturity investments - These assets are non-derivative financial assets with fixed or determinable payments and fixed maturities that the Company's management has the positive intention and ability to hold to maturity. These assets are measured at amortized cost using the effective interest method less any provision for impairment. The Company does not currently classify any of its financial assets as held-to-maturity investments.

Available-for-sale - Non-derivative financial assets not included in the above categories are classified as available-for-sale. They are carried at fair value with changes in fair value recognized in other comprehensive income (loss). Where a decline in the fair value of an available-for-sale financial asset constitutes objective evidence of impairment, the amount of the loss is removed from accumulated other comprehensive income (loss) and recognized in profit or loss. The Company does not currently classify any of its financial assets as available-for-sale.

All financial assets except those measured at fair value through profit or loss are subject to review for impairment at least at each reporting date. Financial assets are impaired when there is objective evidence of impairment as a result of one or more events that have occurred after initial recognition of the asset and that event has an impact on the estimated future cash flows of the financial asset or the group of financial assets.

(ii) Financial liabilities

The Company classifies its financial liabilities into one of two categories as follows:

Fair value through profit or loss - This category comprises derivatives and financial liabilities incurred principally for the purpose of selling or repurchasing in the near term. They are carried at fair value with changes in fair value recognized in profit or loss. The Company does not currently classify any of its financial liabilities as fair value through profit or loss.

Other financial liabilities: This category consists of liabilities carried at amortized cost using the effective interest method. The Company classifies its accounts payable, accrued liabilities and due to related parties as other financial liabilities.

ADAMERA MINERALS CORP.

Notes to the Condensed Consolidated Interim Financial Statements

For the Nine Months Ended September 30, 2017

(Unaudited; Expressed in Canadian Dollars)

4. Financial and Capital Risk Management

The Company's financial instruments consist of cash, receivables, accounts payable and accrued liabilities and due to related parties. The fair value of these financial instruments approximates their carrying value due to their short-term nature. Cash is measured at fair value using level 1 inputs.

Credit Risk

Credit risk is the risk of a financial loss to the Company if counterparty to a financial instrument fails to meet its contractual obligations.

The Company's cash is primarily held in major Canadian financial institutions. The Company's receivables consist of cost recoveries and reimbursements. Management believes that the credit risk concentration with respect to financial instruments included in receivables is minimal.

Liquidity Risk

Liquidity risk is the risk that the Company will not be able to meet the financial obligations as they fall due. The Company ensures that there is sufficient capital in order to meet annual business requirements, after taking into account administrative, property holding and exploration budgets. As the Company does not have operating cash flow, the Company has relied primarily on equity financings to meet its capital requirements. The Company is exposed to liquidity risk.

Interest Rate Risk

Interest rate risk is the risk of change in the borrowing rates of the Company. The Company is not exposed to significant interest rate risk due to the short-term maturity of its monetary assets and liabilities.

Foreign Exchange Risk

The Company has operations in the USA and Canada; however its net monetary position in US dollars is minimal and therefore is not exposed to significant foreign exchange risk.

Commodity Risk

The Company's ability to raise capital to fund exploration or development activities is subject to risks associated with fluctuations in the market price of commodities for which it is exploring. The Company closely monitors commodity prices to determine the appropriate course of action to be taken.

ADAMERA MINERALS CORP.

Notes to the Condensed Consolidated Interim Financial Statements

For the Nine Months Ended September 30, 2017

(Unaudited; Expressed in Canadian Dollars)

4. Financial and Capital Risk Management (continued)

Capital management

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to pursue the exploration of its mineral properties and to maintain a flexible capital structure which optimizes the costs of capital at an acceptable risk.

The Company defines its capital as shareholder's equity.

The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue new shares, issue debt, acquire or dispose of assets or adjust the amount of cash.

In order to facilitate the management of its capital requirements, the Company prepares periodic expenditure budgets that are updated as necessary depending on various factors, including successful capital deployment and general industry conditions. In order to maximize ongoing exploration efforts, the Company does not pay out dividends. The Company's investment policy is to keep its cash treasury on demand deposit in an interest bearing Canadian chartered bank account. The Company is not subject to any externally imposed restrictions on its capital. There have been no changes to the Company's management of capital during the period ended September 30, 2017.

7. Mineral Properties (continued)

The Company holds the following mineral claims and permits:

(a) Washington, USA

i) Cooke Mountain

Adamera Minerals, LLC acquired the Cooke Mountain property by staking a 100% interest these properties in Ferry County, Washington, including the Oversight, Lambert Creek and HLK properties.

ii) Empire Creek

On May 21, 2014, Adamera Minerals, LLC entered into a lease and advance royalty agreement whereby the Company has the exclusive rights and lease to acquire an undivided 100% interest in the minerals rights on the Empire Creek property. Pursuant to the terms of the agreement, the following annual lease payments are required:

- i) US\$1,000 on signing (paid) and 10,000 common shares (issued)
- ii) US\$1,000 (paid) and 10,000 common shares in the first year (issued)
- iii) 20,000 common shares on or before December 1, 2015 (issued)
- iv) 20,000 common shares on or before December 1, 2016 (issued)
- v) 50,000 common shares or US\$15,000 cash, at the Company's discretion, on or before December 1, 2017
- vi) 50,000 common shares or US\$20,000 cash, at the Company's discretion, on or before December 1, 2018; and
- vii) 100,000 common shares or US\$20,000 cash, at the Company's discretion, on or before December 1, 2019 and each subsequent year until termination of the agreement

The property is subject to a 2% net smelter returns royalty ("NSR"), of which the Company has the option to purchase one-half of the NSR (1%) for US\$1,000,000 and the second half may be purchased for an additional payment of US\$1,000,000.

iii) Other

Other consists of a 100% interest acquired by staking in these properties in Ferry County, Washington: Flag Hill and Talisman.

(b) Nunavut and Northwest Territories, Canada

The Company holds an interest in certain uranium, diamond and gold properties in Nunavut and the Northwest Territories, Canada that are valued at \$Nil.

During fiscal 2014, the Company entered into an agreement to sell data related to the property for \$50,000 on signing (received) and \$50,000 (received) upon claims getting registered, and 1,000,000 common shares on registration of claims within an area of interest. The Company will retain a 2% gross overriding royalty on diamonds mined in the area of interest.

As a result of previously ceasing activities on these properties, the Company is required to dispose of fuel and related camp supplies. The Company has recorded a provision for disposal costs of \$155,912 (December 31, 2016 - \$155,912). During this quarter, the Nunavut government has notified the Company that a fuel drum had leaked. Adamera has submitted a plan for clean up.

(c) Stock Options

The Company has established a share option plan whereby the board of directors may, from time to time, grant options to directors, officers, employees or consultants. Options granted must be exercised no later than ten years from the date of grant (or lesser period prescribed by the Exchange policies), or such lesser period as determined by the Company's board of directors. The exercise price of an option is equal to or greater than the closing market price on the Exchange on the day preceding the date of grant. The vesting terms for each grant are set by the Board of Directors. The share option plan provides that the aggregate number of shares reserved for issuance under the plan shall not exceed 10% of the total number of issued and outstanding shares, calculated at the date of grant.
