This interview is in response to a recent video by the company that documents various datasets used for targeting on the Buckhorn 2.0 project.

“We are developing these videos to keep our shareholders up to date on our progress and to provide some insight to the steps required to develop a drill target. Many of our shareholders are not geologists and I hope this is an effective means of presenting the technical intricacies of target development for drilling,” says Mark Kolebaba, President and CEO of Adamera Minerals Corp.
