TALISMAN TUNGSTEN

THE FLAGSHIP — DISTRICT-SCALE TUNGSTEN OPPORTUNITY

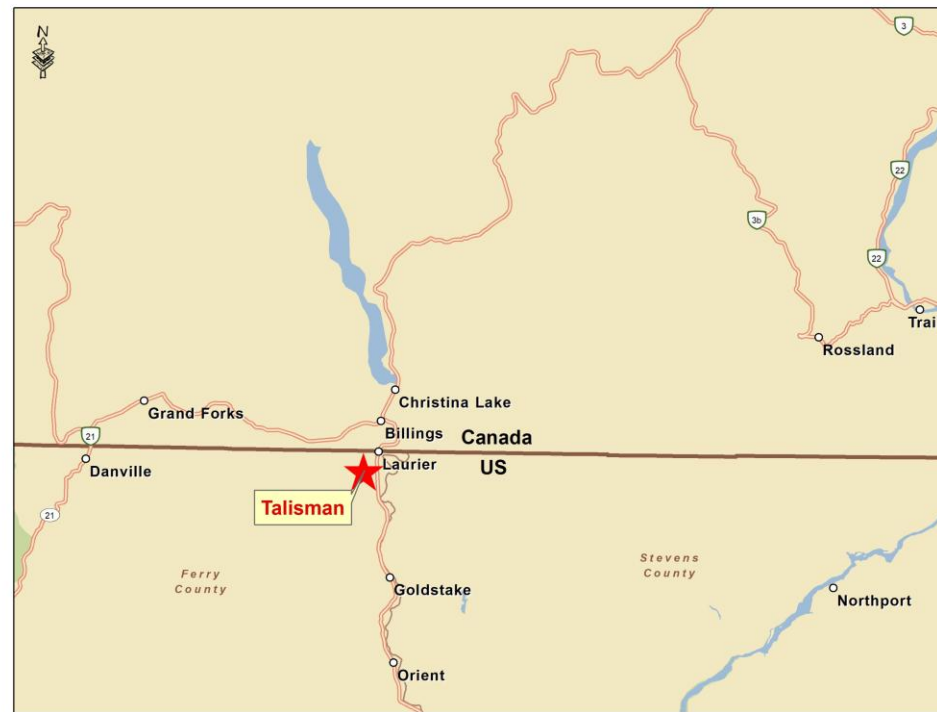

KEY HIGHLIGHTS

- ✓ Past producer of tungsten, copper, zinc, lead & silver
- ✓ Historical mining reported 5% Cu, 3 opt Ag & 0.35–1% WO₃
- ✓ New prospect confirming 0.33% WO₃ — district extends beyond the mine
- ✓ Numerous widespread targets completely untested by modern drilling
- ✓ Road accessible — low-cost exploration with immediate ground access

Talisman 2026

Surface Work - Permitting

- Magnetics is complete
- VLF-EM to be done
- Soil Sampling - ½ Complete
- Prospecting - In Progress

• Underground Work

- Engineer Site Visit - complete
- Service Existing Road
- Open Mine
- Map, Sample, drill pad

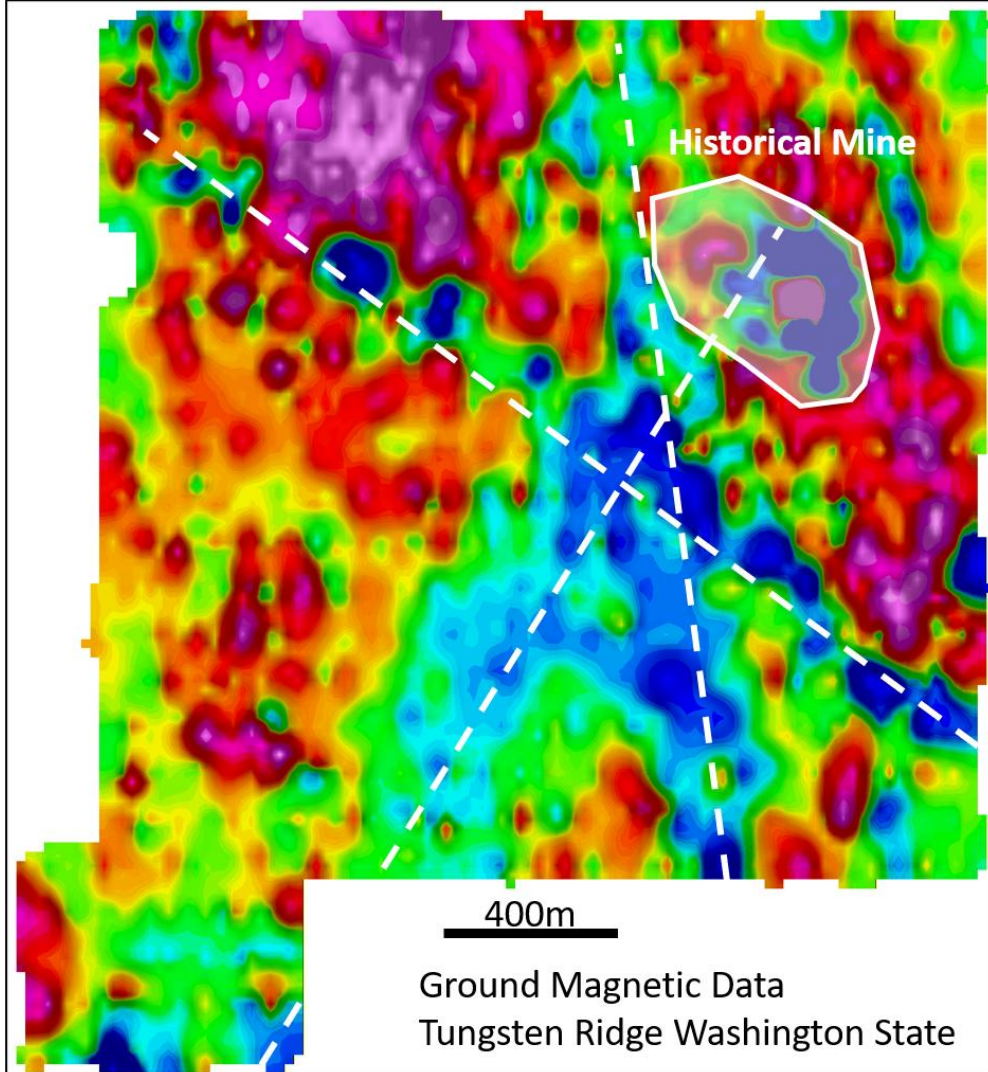

TUNGSTEN RIDGE

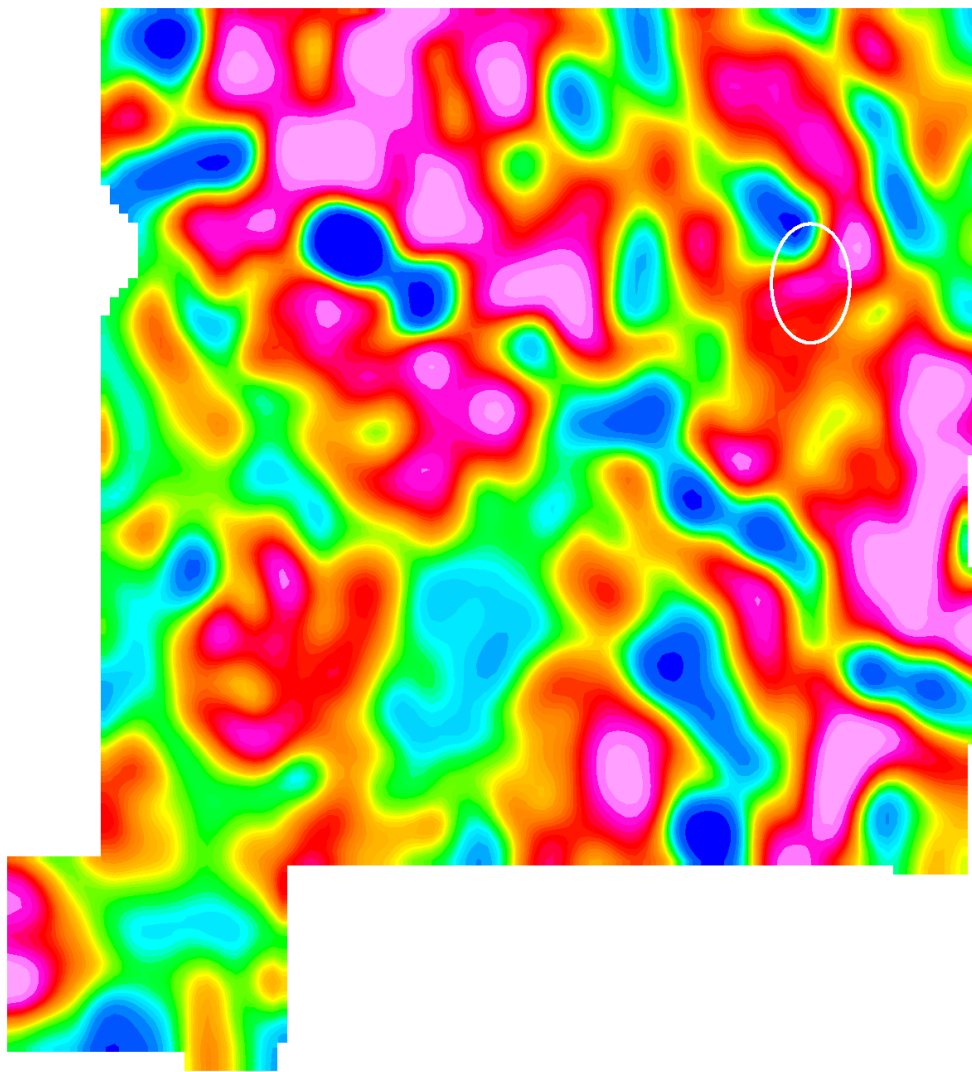

PAST PRODUCER. VIRGIN GROUND. WELL-DEFINED TARGETS. READY TO EXPLORE.

KEY HIGHLIGHTS

- ✓ Historical production confirms W–Cu–Ag–Mo polymetallic mineralization
- ✓ New target zones untested, mineralization at mine untested at depth
- ✓ Magnetic data delineate clear anomalies; Next step - prioritize targets.
- ✓ Road-accessible, nearby services, low-cost and rapid exploration
- ✓ Tungsten grades 0.1 ppm with high grade zones up to 7.6% reported

Tungsten Ridge 2026

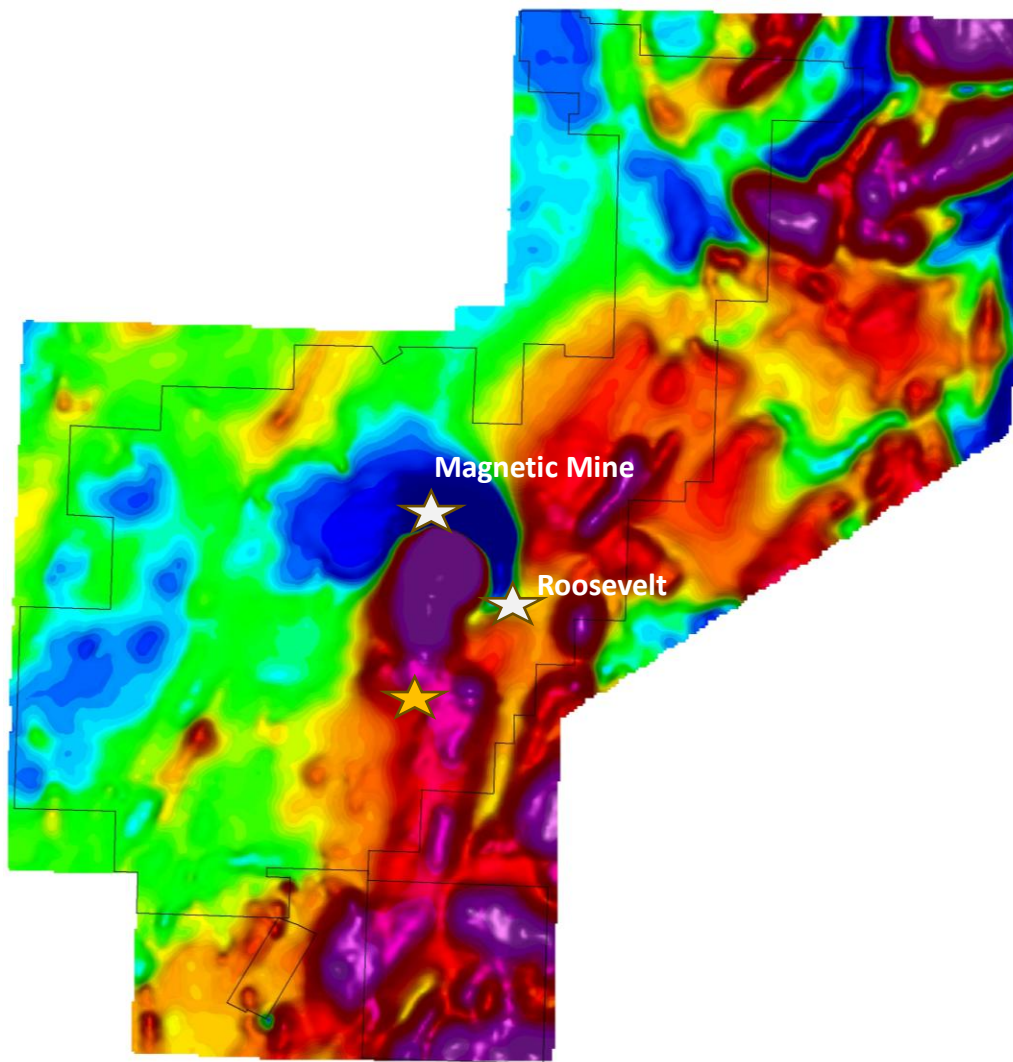

Surface Work - Permitting

Pierre Creek

PAST PRODUCER. VIRGIN GROUND. WELL-DEFINED TARGETS. READY TO EXPLORE.

KEY HIGHLIGHTS

- ✓ Historical production Iron Ore, W and Cu polymetallic mineralization
- ✓ New target zones untested, mineralization at mine untested at depth
- ✓ Currently sampling old open pit
- ✓ Road-accessible, nearby services, low-cost and rapid exploration
- ✓ Higher grade tungsten zones reported in west pit

SUPPLY CONSTRAINTS

- China controls ~80% of global production
- Chinese exports fell to ZERO in late 2025
- Declining ore grades at all major Chinese mines
- Beijing export restrictions on dual-use minerals
- No significant new mines outside China in pipeline

EXPLOSIVE NEW DEMAND

- Defense spending surge — NATO at 2%+ GDP
- AI data centres require tungsten tooling & shielding
- Semiconductor fab buildout — CHIPS Act funded
- EV & aerospace expansion driving cemented carbide
- US DoD backing domestic tungsten production

"The world has sleepwalked into a tungsten crunch. With inventories depleted and another supply deficit forecast, prices are expected to remain structurally elevated." — BMO Global Commodities Research

GOLD CATALYST

**SOUTH HEDLEY —
GLIX**

British Columbia, Canada

TESTING:

Confirm gold mineralization

Gold skarn target up to 4 g/t Au in soil —
drill to confirm underlying mineralization

COPPER–GOLD CATALYST

**SOUTH HEDLEY —
MAX**

British Columbia, Canada

TESTING:

Confirm Cu-Au porphyry

3km geochemical & geophysical target
IP & drill to confirm new Cu-Au porphyry
